

NATIONAL SENIOR CERTIFICATE

GRADE 12

ENGINEERING GRAPHICS AND DESIGN P2

NOVEMBER 2019

MARKS: 100

TIME: 3 hours

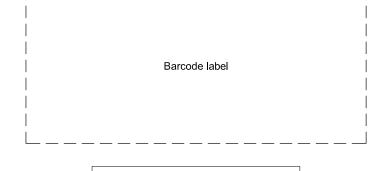

INSTRUCTIONS AND INFORMATION

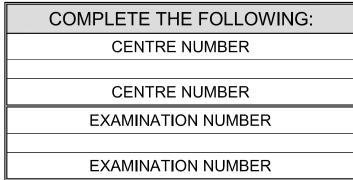

- 1. This question paper consists of FOUR questions.
- 2. Answer ALL the questions.
- 3. ALL drawings are in third-angle orthographic projection, unless otherwise stated.
- 4. ALL drawings must be prepared using pencil and instruments, unless otherwise stated.
- 5. ALL answers must be drawn accurately and neatly.
- 6. ALL the questions must be answered on the QUESTION PAPER, as instructed.
- 7. ALL the pages, irrespective of whether the question was attempted or not, must be re-stapled in numerical sequence in the TOP LEFT-HAND CORNER ONLY.
- 8. Time management is essential in order to complete all the questions.
- 9. Print your examination number in the block provided on every page.
- 10. Any details or dimensions not given must be assumed in good proportion.

TITLE	HANICAL JIG				

QUESTION 1: ANALYTICAL (MECHANICAL)

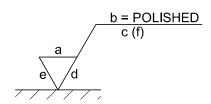

Two views and a section of a mechanical jig, a title block and a table of questions. The drawing has not been prepared to the indicated scale.

Instructions:

Complete the table below by neatly answering the questions which refer to the accompanying drawing, the title block and mechanical content.

	QUESTIONS	ANSWER	S	
1	What was Ingrid's responsibility?		1	Т
2	What is the manufacturer's website address?		1	
3	What is the file name?		1	
4	Who is the client?		1	T
5	How many jigs must be manufactured?		1	
6	What is VIEW 1 called?		2	
7	What type of section is VIEW R-R?		1	
8	Name the type of section produced by cutting plane T-T.		1	
9	Determine the complete dimensions at: A: B:	C: D: E:	5	
10	Determine the total length of the jig.		1	
11	Name the feature at F.		1	
12	What is the minimum depth of the thread required for the hole at G?		1	
13	Name the feature at H.		1	
14	How many surfaces of the jig must be machined?		1	
15	Describe the hatching mistake on VIEW 1.		2	
16	With reference to the tolerance, determine the minimum height at J.		1	
/		DIRECTION OF LAY		
47	With reference to the machining symbol below, match the letter on the symbol with the correct label in the column to the right of	ROUGHNESS VALUE		
	this question.	SAMPLING LENGTH	4	
		MACHINING ALLOWANCE		
18	In the space below (ANSWER 18), draw, in neat freehand, the sy	mbol for the projection system used.	4	
		тот	AL 30	

QUESTION 17: ANSWER 18:

EXAMINATION NUMBER	
EXAMINATION NUMBER	2

and Design/P2

Given:

- The detail of a wedge-shaped follower and the camshaft
- The position of centre point S on the drawing sheet

Specifications:

- The follower reciprocates on the vertical centre line of the camshaft
- The minimum distance from the follower to the centre of the camshaft = 17 mm
- Rotation = anti-clockwise

QUESTION 2: LOCI (CAM)

Motion:

The cam imparts the following motion to the follower:

- It descends 56 mm with uniform acceleration and retardation over the first 180°
- It rises 20 mm with uniform motion over the next 45°
- There is a dwell period for the next 45°
- It returns to its original position with simple harmonic motion over the rest of the rotation

Instructions:

- Draw, to scale 1 : 1, the given camshaft and the wedge-shaped follower at the minimum distance.
- Draw to a rotational scale of 30° = 8 mm and a displacement scale of 1 : 1, the complete displacement graph for the required motion.
- Label the displacement graph and include the scale.
- Project and draw the cam profile from the displacement graph.
- Show the direction of rotation on the cam profile.
- Show ALL construction and projection. [38]

QUESTION 3: ISOMETRIC DRAWING

Given:

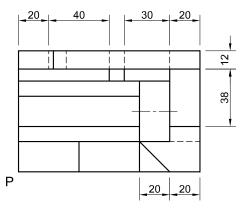

- The front view, top view and left view of a tool jig
- The position of point P on the drawing sheet

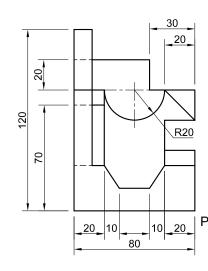

Instructions:

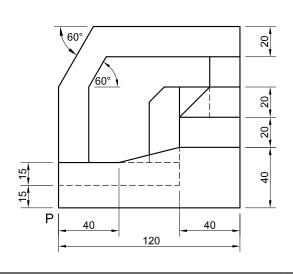

Using scale 1: 1, convert the orthographic views of the tool jig into an isometric drawing.

- Make P the lowest point of the drawing.
- Show ALL construction.
- NO hidden detail is required.

QUESTION 4: ASSEMBLY DRAWING

Given:

- The exploded isometric drawing of the parts of a gear and sump assembly, showing the position of each part relative to all the others.
- Orthographic views of each of the parts of the gear and sump assembly
- An example of the conventional representation of a spur gear

Instructions:

- Answer this question on page 6.
- Draw, to scale 1: 1 and in third-angle orthographic projection, the following views of the assembled parts of the gear and sump assembly:
- **4.1 The half-sectional front view** on cutting plane A-A. Show the left half in section, as seen from the direction of the arrow on the exploded isometric drawing. The cutting plane is shown on the top view of the spur gear (part 3).
- **4.2 The top view**. Show only the top half of the view by applying the convention for the presentation of a symmetrical object.

NOTE:

- · Planning is essential.
- ALL drawings must comply with the guidelines as contained in the SANS 10111.
- Show THREE faces of the M20 nut (part 1).
- Draw the conventional representation of the spur gear (part 3) in both views.
- NO hidden detail is required.
